"Be the change that you want to see in the world."

Summary

I received my PhD in Applied Mathematics in June 2020 and have since worked as a lecturer at a private university in Indonesia. I have a passion for intelligent pattern recognition algorithms and a track record of success in developing algorithms for single and multi-view learning. I have a strong background in machine learning techniques, including classification, feature selection/reduction, parameter estimation, regression, and clustering, and I am well-versed in data analysis and model validation. I am also proficient in tools such as Matlab, Python, and R, which I have used to prototype solutions for testing algorithms on large data sets.
